# Connectivity

May 05, 2017

# Strengths

- Creation of the MnDOT Asset Management Project Office in support of planning and preservation of Transportation Maintenance assets.
- Creation of Facilities Planning and Program Management unit in support of facilities asset management activities.
- Creation of Internal Service Fund for Fleet Management – Optimizing life cycle
- Developing Roadside Vegetation Specifications and Manual
- Utilization of MnROAD resources in support of routine and preventive pavement practices.
- Utilization of multiple Research and Implementation Programs

# Challenges

- Public perception of expectations relating to the delivery of Maintenance products and services
- Balancing a centralized vs. decentralized role specific to the delivery of transportation Maintenance products and services.
- Keeping pace with technological/software changes
- Attract and maintain a trained and qualified staff
- Funding streams fluctuations
- Aligning funding with Products and Services

# Share an Innovation

- Commercial Vehicle Oversize/Overweight Unified Permitting Process
  - Hauling Industry promoting since the 1990's
  - Accommodate the All Roads Network concept
  - Multiple Agencies including Industry involvement
  - Theme focus on Policy and Technology
  - Phase 1 completed July 2017, currently entering phase II
  - [UPP Story Map](#)

# How can No Boundaries help?

- Through sharing of knowledge and practice lending itself toward practical applications in Minnesota.
- Developing relationships
- Expand summer Maintenance opportunities

# Thank You!
