

How to Borrow This Idea

This document will serve as a guide to implement the **The Binford Retriever 9000**...it's easier than you think!

Instructions for replication:

1. Attach the winch and roller to the crib.
2. Use a forklift to place the crib in the receiver hitch and secure.
3. Place the battery box in the bed of the truck and hook up quick connect cabling.

Instructions for use:

1. Fold the rumble strip in half.
2. Put the winch in free-wheel mode and pull the winch cable out to the guard rail.
3. Hook the winch into the slot on the rumble strip and put the winch into locked mode.
4. Plug in the winch remote.
5. Move the button to the in position to retrieve the rumble strip.
6. Align the rumble strip in the crib and repeat as necessary.
